INDEX TO VOLUME 29

Acid production of *Lactobacillus acidophilus*, Some tests on the. Bacterial growth with automatic pH control. (a) An apparatus. (b)..... 595
Active immunization of experimental animals and children against poliomyelitis with formalin inactivated virus suspension. Abstract..... 65
Agglutination with *B. proteus* X19 in specimens submitted for other serological tests. Abstract..... 46
Allen, Esther C. and ZoBell, Claude E. The significance of marine bacteria in the fouling of submerged surfaces..... 229
Alpha-methylglucoside, The fermentation of, by bacteria..... 363
Anaerobes, butyric acid, Products from the fermentation of glucose and arabinose by..... 333
Anaerobic bacteria, Studies on. III. Historical review and technique of culture of certain thermophilic anaerobes..... 173
—— ——, —— ——. IV. Taxonomy of cultures of a thermophilic species causing "swells" of canned foods..... 189
Application of statistics to problems in bacteriology. IV. Experimental comparison of the dilution method, the plate count, and the direct count for the determination of bacterial populations..... 609
—— of the H-O technique of agglutination to certain clostridia. Abstract.. 59
Avian psittacosis. Abstract..... 67
Azochloramid (N-N-Dichloroazodicarbonamidine), Bactericidal action of... 323

Bacilli, Tubercle, The relationship of soil protozoa to..... 369
Bacillus, A new species of the genus, exhibiting mobile colonies on the surface of nutrient agar..... 229
—— *carnis* (Klein), The differentiation of *Bacillus fallax* (Weinberg and Séguin) from..... 573
—— —— ——, The identification of von Hibler's "Bacillus VI" as..... 269
—— *fallax* (Weinberg and Séguin), The differentiation of, from *Bacillus carnis* (Klein)..... 573
—— *megatherium*, Further observations on certain variants of..... 389
——, The Morgan..... 131
—— *Pasteuri* group, An investigation of the. III. Systematic relationships of the group..... 491
—— *violaceus*, The pigment of. I. The production, extraction, and purification of violacein..... 223
Bacteria, A comparison of the maximal growth rates of various, under optimal conditions..... 103
——, A protractor for computing the growth rate of..... 99
——, Chitinovorous. A preliminary survey..... 449
——, Comparative studies of presumptive test media for the coli-aerogenes group of..... 163

Bacteria, Decomposition of organic matter in sea water by. I. Bacterial multiplication in stored sea water..... 531
——, —— —— —— —— —— —— —— ——. II. Influence of addition of organic substances upon bacterial activities..... 545
—— in travertine from the Yellowstone. Abstract..... 3
——, Isolation and identification of the substance in potato stimulating the production of butyl alcohol by certain..... 563
—— of the genus salmonella, Decomposition of salts of organic acid by..... 253
——, Studies on cultural requirements of. IV. Quantitative estimation of bacterial growth..... 383
—, —— —— —— —— ——. V. The diphtheria bacillus..... 515
——, The fermentation of alpha-methylglucoside by..... 363
——, The, responsible for ripeness in Emmental cheese milk. Abstract..... 70
Bacterial activities, Influence of addition of organic substances upon. Decomposition of organic matter in sea water by bacteria. II..... 545
—— contents of chlorinated swimming pools during periods of use. Abstract..... 26
—— growth, Quantitative estimation of. Studies on cultural requirements of bacteria..... 383
—— —— with automatic pH control. (a) An apparatus. (b) Some tests on the acid production of *Lactobacillus acidophilus*..... 595
—— -inhibitory substance produced by a mold. Some properties of a..... 215
—— multiplication in stored sea water. Decomposition of organic matter in sea water by bacteria. I..... 531
—— polysaccharides, The precipitation of, with calcium phosphate. Pneumococcus..... 149
—— populations, Experimental comparison of the dilution method, the plate count, and the direct count for the determination of. Application of statistics to problems in bacteriology. IV..... 609
—— ——, Studies of certain factors influencing the size of..... 205
—— variation: An inquiry into the underlying principles governing the cell morphology of *Bacillus megatherium*. Abstract..... 13
Bactericidal action of azochloramid (N-N-Dichloroazodicarbonamidine).... 323
——, The, and antiseptic action of preservatives frequently used in biological products, and the effect of these preservatives on the potencies of the products. Abstract..... 6
Bacteriology, Application of statistics to problems in. IV. Experimental comparison of the dilution method, the plate count, and the direct count for the determination of bacterial populations..... 609
Baldwin, I. L., Reid, J. J. and Fred, E. B. The effects of storage on rhizobia. Abstract..... 75
Batchelor, Harold W. and Paschall, Alfred H. The relationships between the biological activities and certain chemical constituents of muck. Abstract..... 82
Bayliss, Milward and Halvorson, H. Orin. Germicidal and detoxifying properties of soaps. Abstract..... 9
Bayne-Jones, S. and Eaton, Monroe D. Purification and concentration of diphtheria toxin. Abstract..... 56

Beard, Paul J., Cleary, J. P., and Clifton, C. E. Studies of certain factors influencing the size of bacterial populations 205
Beavens, E. A. and James, Lawrence H. Electro-silver preservation of fruit juices. Abstract 73
——, ——, Phillips, Max and Goss, M. J. A study of the microbiological decomposition of the constituents of alfalfa hay and its application to spontaneous heating. Abstract 83
Behavior, The, of the virus of equine encephalomyelitis on the chorioallantoic membrane of the developing chick 399
Behrens, C. A. and Nielsen, F. A. Purification of suspensions of the virus of vaccinia. Abstract 60
Bengston, Ida A. Studies on the standardization of gas gangrene antitoxin (Oedematiens). Abstract 46
Benton, Anne G. Chitinovorous bacteria,—a preliminary survey. Abstract 20
——, ——. Chitinovorous bacteria. A preliminary survey 449
Berens, Conrad, and Chapman, George H. Crystal violet agar as a differential medium for staphylococci 437
Biological characters of *Shigella paradysenteriae*, Changes in, during dissociation and partial reversion. Studies in microbic dissociation. II 583
——, The, activity of a few chemical constituents of brucella cells. Abstract 58
Bird, H. R., Peterson, W. H. and McClung, L. S. Some bacteriological and chemical aspects of A. I. V. silage. Abstract 84
Bliss, Eleanor A. and Long, Perrin H. The cultural and serological characteristics of minute hemolytic streptococci. Abstract 38
—— and ——. The incidence and significance of minute hemolytic streptococci. Abstract 39
Boyd, William C. and Hooker, Sanford B. Two antigens of high molecular weight: hemocyanins of *Limulus polyphemus* and *Busycon* (Fulgur) *canaliculatum*. Abstract 57
Brainard, D. H. and Noble, W. C., Jr. A note on the susceptibility of ferrets to the virus of the common cold 407
Brodie, Maurice. Active immunization of experimental animals and children against poliomyelitis with formalin inactivated virus suspension. Abstract 65
—— and Park, William H. An investigation into the mechanism of adult immunity against poliomyelitis. Abstract 64
Brown, P. E. and Walker, R. H. The numbers of *Rhizobium meliloti* and *Rhizobium trifolii* in soils as affected by soil management practices. Abstract 77
Brucella infections in white mice. Abstract 44
Buchbinder, Leon and Deskowitz, Maurice A. A species of salmonella producing a water-soluble pigment 293
Bunker, J. W. M. and Jennison, M. W. Some quantitative relationships in bacterial population cycles. Abstract 19
Burke, Victor, Conn, H. J., Chairman; Hall, Ivan C., Jennison, M. W., Kennedy, J. A., Cohen, Barnett and Genung, Elizabeth F., Members. Re-

port of the Committee on Bacteriological Technic: Progress during 1934. Abstract 2
Buswell, A. M. Study of the chemical mechanism of anaerobic methane production. Abstract 81
Butyl alcohol, Isolation and identification of the substance in potato stimulating the production of, by certain bacteria 563
Butyric acid anaerobes, Products from the fermentation of glucose and arabinose by 333

Calcium phosphate, Bacterial polysaccharides, The precipitation of, with calcium phosphate. Pneumococcus 149
Calculated energy effects as suggestive of a mechanism of the influence of antigen on antibody formation. Abstract 52
Carbohydrate-nitrogen, The, relationship in symbiotic nitrogen fixation. Abstract 82
Carey, Cornelia L. and Waksman, Selman A. Decomposition of organic matter in sea water by bacteria. I. Bacterial multiplication in stored sea water 531
—— and Waksman, Selman A. Decomposition of organic matter in sea water by bacteria. II. Influence of addition of organic substances upon bacterial activities 545
Carotenoid, The, pigments of several bacterial species. Abstract 74
Carpenter, Charles M. and Leahy, Alice D. The isolation of *Neisseria gonorrhoeae*. Abstract 36
Carpenter, Philip L., Fulton, MacDonald, and Stuart, C. A. Stimulation of bacterial growth rate by methyl germanic oxide. Abstract 18
Chapman, George H. and Berens, Conrad. Crystal violet agar as a differential medium for staphylococci 437
Chick, the developing, The behavior of the virus of equine encephalomyelitis on the chorioallantoic membrane of 399
Chitinovorous bacteria,—a preliminary survey. Abstract 20
—— ——. A preliminary survey 449
Chorioallantoic membrane of the developing chick, The behavior of the virus of equine encephalomyelitis on the 399
Clark, Paul F. and Lynch, Lucille C. Endogenous infections by *Clostridium welchii*. Abstract 36
Clawson, B. J. The relationship of antibody content to allergy and resistance in animals vaccinated with B.C.G. Abstract 32
Cleary, J. P., Beard, Paul J. and Clifton, C. E. Studies of certain factors influencing the size of bacterial populations 205
Clifton, C. E., Beard, Paul J. and Cleary, J. P. Studies of certain factors influencing the size of bacterial populations 205
Coburn, A. F. Observations on an epidemic infection with hemolytic streptococcus in an isolated group of rheumatic subjects. Abstract 39
Cohen, Barnett, Conn, H. J., Chairman; Burke, Victor, Hall, Ivan C., Jennison, M. W., Kennedy, J. A., and Genung, Elizabeth F., Members. Report of the Committee on Bacteriological Technic: Progress during 1934. Abstract 2
—— and Shwachman, Harry. Some oxidation and reduction reactions of pneumococcal hemolysin. Abstract 54

Coleman, Marion B. and Gilbert, Ruth. Agglutination with *B. proteus* X19 in specimens submitted for other serological tests. Abstract 46
Coli-aerogenes group of bacteria, Comparative studies of presumptive test media for the 163
Common cold, A note on the susceptibility of ferrets to the virus of the ... 407
Comparative studies of presumptive test media for the coli-aerogenes group of bacteria 163
Comparison, A, of streptococci from the colon with Bargen's organism. Abstract 68
——, A, of the incidence and biological characteristics of the hemolytic *Bacillus coli* recovered from the intestinal tract of healthy individuals and patients with ulcerative colitis. Abstract 35
—, A, of the maximal growth rates of various bacteria under optimal conditions 103
Conn, H. J., Chairman; Burke, Victor, Hall, Ivan C., Jennison, M. W. Kennedy, J. A., Cohen, Barnett and Genung, Elizabeth F., Members. Report of the Committee on Bacteriological Technic: Program during 1934. Abstract 2
Coulter, Calvin B., Kabat, Elvin A. and Stone, Florence M. The spectrographic identity of horse euglobulin and pneumococcus antibody solution purified according to Felton. Abstract 54
Crawford, Robert R., Jordan, Edwin O. and McBroom, Josephine. The Morgan bacillus 131
Critical, A, study of some media used for the detection of colon organisms in water and milk. Abstract 27
Crystal violet agar as a differential medium for staphylococci 437
Cultural reactions, The fibrinolytic activity of hemolytic streptococci in relation to the source of strains and to 111
—— requirements of bacteria, Studies on. IV. Quantitative estimation of bacterial growth 383
——, The, and serological characteristics of minute hemolytic streptococci. Abstract 38
Curtis, L. R. and Stark, C. N. A critical study of some media used for the detection of colon organisms in water and milk. Abstract 27

Davis, D. J. The dissemination of human pathogenic streptococci through the cow's udder. Abstract 42
Dawson, Martin H. and Olmstead, Miriam. Variation in *Streptococcus hemolyticus*. Abstract 11
Decomposition of organic matter in sea water by bacteria. I. Bacterial multiplication in stored sea water 531
—— of organic matter in sea water by bacteria. II. Influence of addition of organic substance upon bacterial activities 545
—— of salts of organic acids by bacteria of the genus salmonella 253
Delves, Edna. Simultaneous immunization with a mixture of ten kinds of laked blood. Abstract 49
Deskowitz, Maurice W. and Buchbinder, Leon. A species of salmonella producing a water-soluble pigment 293
Devereux, E. D. and Mallmann, W. L. The disinfection of beverage glasses by chlorine preparations. Abstract 70

Dienes, L. The plan of bacterial allergy in the immunization process. Abstract 28
Differential medium, Crystal violet agar as a, for staphylococci 437
Differentiation, The, of *Bacillus fallax* (Weinberg and Séguin) from *Bacillus carnis* (Klein) 573
Dilution method, the plate count, and the direct count. Experimental comparison of the, for the determination of bacterial populations. Application of statistics to problems in bacteriology. IV 609
Diphtheria bacillus, The. Studies on cultural requirements of bacteria. V.. 515
Disinfection, The, of beverage glasses by chlorine preparations. Abstract.. 70
Dissemination, The, of human pathogenic streptococci through the cow's udder. Abstract 42
Dissimilation of glucose by propionic acid bacteria. Abstract 84
Dissociation of *Saccharomyces aceris-sacchari* Fabian and Hall and *Pichia alcoholophila* Klöcker. Abstract 11
Dorner, W. and Erekson, Arthur B. The bacteria responsible for ripeness in Emmental cheese milk. Abstract 70
—— and Hellinger, Esther. Studies on the Voges-Proskauer test. Abstract 16
Duffett, Nicholas D. The differentiation of *Bacillus fallax* (Weinberg and Séguin) from *Bacillus carnis* (Klein) 573
—— and Hall, Ivan C. The identification of von Hibler's "Bacillus VI" as *Bacillus carnis* (Klein) 269
—— and ——. The relation of von Hibler's "Bacillus VI" to *Bacillus carnis* (Klein) and its differentiation from other microaerophilic bacilli. Abstract 4
Duration of local skin reactivity induced by bacterial filtrates. Abstract.. 30

Eaton, Monroe D. and Bayne-Jones, S. Purification and concentration of diphtheria toxin. Abstract 56
Eddie, B. and Meyer, K. F. Avian psittacosis. Abstract 67
Effect of dissociation on specificity of hemolytic streptococci. Abstract 37
—— of temperature and boric acid on gas production in the colon group. Abstract 24
——, The, of asparagin and related compounds on certain butyric acid fermentations. Abstract 87
Effects, The, of microbiological activity during the aging of some moist ceramic materials. Abstract 79
——, The, of storage on rhizobia. Abstract 75
Electro-silver preservation of fruit juices. Abstract 73
Encephalomyelitis, equine, The behavior of the virus of, on the chorioallantoic membrane of the developing chick 399
Endogenous infections by *Clostridium welchii*. Abstract 36
England, C. W. and Stark, C. N. Formate ricinoleate broth—a new medium for the detection of colon organisms in water and milk. Abstract 26
Eosin methylene blue smear agar for rapid direct count of *E. coli*. Abstract.. 28
Erb, C., Werkman, C. H., Stone, R. W. and Wood, H. G. Oxidation reduction potential studies on propionic acid bacteria. Abstract 86

Erb, C., Wood, H. G., Stone, R. W. and Werkman, C. H. Intermediate behavior of succinic and acetic acids in the propionic fermentation. Abstract... 85
Erekson, Arthur B. and Dorner, W. The bacteria responsible for ripeness in Emmental cheese milk. Abstract..... 70
Escherichia-aerobacter intermediates, Studies on the. I. Cultural characteristics..... 349
Escherichia coli and *Escherichia communior*, A comparison of the activity of. Evidence on the specificity of hexosidases..... 391
—— *communior*, *Escherichia coli* and, A comparison of the activity of. Evidence on the specificity of hexosidases..... 391
Etchells, J. L., Kopeloff, L. M., Kopeloff, N., and Hinsie, L. E. Lowenstein's method of culturing *B. tuberculosis*. Abstract..... 33
Evans, Alice C. Sensitivity to nascent phage as a character for the differentiation of the beta type of streptococci. Abstract..... 40
Evidence on the specificity of hexosidases. A comparison of the activity of *Escherichia coli* and *Escherichia communior*..... 391
Experimental comparison of the dilution method, the plate count, and the direct count for the determination of bacterial populations. Application of statistics to problems in bacteriology. IV..... 609

Fabian, F. W. and Wickerham, L. J. Dissociation of *Saccharomyces acerissacchari* Fabian and Hall and *Pichia alcoholophila* Klöcker. Abstract.. 11
Factors influencing growth and sterol production of *Aspergillus fischeri*. Abstract..... 89
Farrell, Michael A. Studies on the respiratory mechanism of the streptococci. Abstract..... 10
——. Studies on the respiratory mechanism of the streptococci..... 411
Fate, The, of specific antigen in the immunized animal: Extent of its (1) Temporary retention in area of injection, (2) Diffusion from this area, (3) Destruction in this area, and (4) Destruction following diffusion. Abstract..... 50
Felton, Lloyd D. The fraction of the pneumococcus antigenic for human beings. Abstract..... 55
——, Kauffman, Gladys, and Stahl, Helene J. The precipitation of bacterial polysaccharides with calcium phosphate. Pneumococcus..... 149
Fermentation of glucose and arabinose by butyric acid anaerobes, Products from the..... 333
——, The, of alpha-methylglucoside by bacteria..... 363
——, The, of cellobiose by bacteria. Abstract..... 20
Ferrets, A note on the susceptibility of, to the virus of the common cold.... 407
Fibrinolytic, The, activity of hemolytic streptococci in relation to the source of strains and to cultural reactions..... 111
Fitzgerald, Helen, Mackenzie, G. M., and Irons, Vernal. Studies in microbic dissociation. II. Changes in the biological characters of *Shigella paradysenteriae* during dissociation and partial reversion..... 583
Foods, canned, Taxonomy of cultures of a thermophilic species causing "swells" of. Studies on anaerobic bacteria. IV..... 189

Formate ricinoleate broth—a new medium for the detection of colon organisms in water and milk. Abstract 26
Fraction, The, of the pneumococcus antigenic for human beings. Abstract .. 55
Fred, E. B., Baldwin, I. L. and Reid, J. J. The effects of storage on rhizobia. Abstract 75
—— and Langlykke, A. F. Products from the fermentation of glucose and arabinose by butyric acid anaerobes. Abstract 86
——, Peterson, W. H. and Tatum, E. L. Isolation and identification of the substance in potato stimulating the production of butyl alcohol by certain bacteria 563
——, Wenck, P. R. and Greene, H. C. Factors influencing growth and sterol production of *Aspergillus fischeri*. Abstract 89
Frisch, A. W. and Levine, Philip. The specific behavior of bacteriophage. Abstract 67
Fulton, MacDonald, Carpenter, Philip L. and Stuart, C. A. Stimulation of bacterial growth rate by methyl germanic oxide. Abstract 18
—— and Stuart, C. A. Growth curves of *Escherichia coli* and *Salmonella schottmuelleri* in mixed cultures. Abstract 18
Further application of semisolid media in cultivation and identification of sporulating anaerobes. Abstract 18
—— observations on certain variants of *Bacillus megatherium* 389
—— studies on frozen vegetables 313
—— —— on spontaneous variation of *Torula pulcherrima* 259

Gehm, H. W. and Heukelekian, H. Eosin methylene blue smear agar for rapid direct count of *E. coli*. Abstract 28
Genung, Elizabeth F., Conn, H. J., Chairman; Burke, Victor, Hall, Ivan C., Jennison, M. W., Kennedy, J. A., Cohen, Barnett, Members. Report of the Committee on Bacteriological Technic: Program during 1934. Abstract 2
Gerber, L. and Gerwe, E. Tissue extracts and anaphylactic shock. Abstract 32
Germicidal and detoxifying properties of soaps. Abstract 9
—— properties of water containing minute amounts of silver. Abstract 7
Gerwe, E. and Gerber, L. Tissue extracts and anaphylactic shock. Abstract 32
Gibson, T. An investigation of the *Bacillus Pasteuri* group. III. Systematic relationships of the group 491
Gilbert, Ruth and Coleman, Marion B. Agglutination with *B. proteus* X19 in specimens submitted for other serological tests. Abstract 46
